

# Paediatric personal healthcare planning

Ark Complex Care provides paediatric services of the highest quality. Every family is unique, so we tailor our services to meet your specific needs. We will help you reach the levels of health and social independence you strive for, in your own environment.

We can help families who are affected by acquired brain injury, neurological conditions, undiagnosed conditions, ventilation needs and spinal cord injuries, for example. And we'll create an individual care plan based on your own personal needs.

You and your family may find it difficult to cope with the changes in your child's health and, at times, adapting your life may seem impossible. So we will help to make things as easy as we can. We'll work with you to make sure your child's care programme fits in with your lives, for example going to school, after school activities and other social events.

We know you need high-quality clinical care, but we know you also need support to carry on with your family, social and work lives. Your child's healthcare plan will be about them as an individual and you as a family, and not just about a diagnosis.

“

**Your child's  
healthcare  
plan will be  
about them as  
an individual  
and you as a  
family, and not  
just about a  
diagnosis.**
