

Spinal cord injuries

At Ark Complex Care we have many years experience in helping people with spinal cord injuries. With our skills and expertise, we can give you the highest level of clinical care.

We can help you with:

- tracheostomy care and changes
- bowel and bladder management
- ventilator support
- physiotherapy – including passive movement

Together we will create a personal healthcare plan, which is all about you and what you want to achieve. We will help you work towards your physical goals and regain your social and vocational skills, so you can go back to work, college or university.

With our support, you can:

- live independently in the comfort of your own home
- remain close to family and friends
- make your own decisions about your care
- resume social and vocational activities
- enjoy the reassurance of our emergency clinical service, on-call 24 hours a day

“

We will help you work towards your physical goals and regain your social and vocational skills.
